

# Questions

---

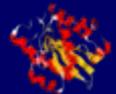

- What data will be generated in goals I, II and III of GTL?
- How can the data be captured?
  - ↳ Should all this data be made publicly accessible, including raw data, e.g., mass spec. data?
- What about QA issues and long-term supports for data curation?
- Should we set and enforce data standards for all the data made publicly available?

# Questions

---

- Should there be a central repository for GLT-generated data?
- What are the potential road blocks in using this data?
- What challenging issues do we foresee in data integration, generated by GTL

# Questions

---

- What are the challenging issues in applying the data?
  - ↳ Integration tools needs?
  - ↳ Data representation
  - ↳ Data mining and analysis tools
- What are the challenging issues in disseminating the data?
- How to get OBER- and ASCR-supported researchers work together on data related issues?
